

AMENDMENTS TO THE CLAIMS

1. **(Withdrawn)** An angiogenesis inducer comprising fibrin.
2. **(Withdrawn)** The angiogenesis inducer according to claim 1, further comprising a biodegradable polymer.
3. **(Withdrawn)** The angiogenesis inducer according to claim 1, further comprising a cell selected from the group consisting of bone-marrow mononuclear cell, bone-marrow stromal cell, stem cell, keratinocyte, fibroblast, myocardial cell, neural stem cell, vascular endothelial cell, endothelial progenitor cell, vascular epithelial cell, osteoblast, chondrocyte, smooth muscle cell, skeletal muscle cell, pancreatic cell, renal cell, enterocyte and stomach cell and/or a tissue comprising said selected cell.
4. **(Withdrawn)** The angiogenesis inducer according to claim 1, further comprising a growth factor.
5. **(Currently Amended)** A method of inducing angiogenesis, comprising treating a living body with fibrin granule preparation containing freeze-dried fibrin, wherein the granule preparation is administered by injection or external application.
6. **(Withdrawn)** A granule preparation produced by freeze-drying fibrin obtained by enzymatic degradation of fibrinogen.
7. **(Withdrawn)** A granule preparation produced by freeze-drying a mixture of fibrin obtained by enzymatic degradation of fibrinogen and calcium.
8. **(Withdrawn)** A skin graft method comprising using fibrin.
9. **(Withdrawn)** A method for prevention or treatment of a disease selected from the group consisting of skin disease, peripheral vascular disease, heart disease, brain disease, bone

disease, respiratory disease, digestive organ disease, endocrine and metabolism disease and autoimmune disease, comprising using fibrin.

10-19. (Cancelled)

20. (Withdrawn) A method for prevention or treatment according to claim 9, wherein the disease is skin disease.

21. (Withdrawn) A method for prevention or treatment according to claim 9, wherein the disease is peripheral vascular disease.

22. (Withdrawn) A method for prevention or treatment according to claim 9, wherein the disease is heart disease.

23. (Withdrawn) A method for prevention or treatment according to claim 9, wherein the disease is brain disease.

24. (Withdrawn) A method for prevention or treatment according to claim 9, wherein the disease is bone disease.

25. (Withdrawn) A method for prevention or treatment according to claim 9, wherein the disease is respiratory disease.

26. (Withdrawn) A method for prevention or treatment according to claim 9, wherein the disease is digestive organ disease.

27. (Withdrawn) A method for prevention or treatment according to claim 9, wherein the disease is endocrine and metabolism disease.

28. (Withdrawn) A method for prevention or treatment according to claim 9, wherein the disease is autoimmune disease.

29. (Withdrawn) A method of subcutaneously transplanting an artificial organ, comprising using fibrin.

30. (Currently Amended) ~~Use of~~ A method of using a granule preparation containing freeze-dried fibrin ~~fibrin~~ for inducing angiogenesis comprising treating a living body with a granule preparation containing freeze-dried fibrin, wherein the granule preparation is administered by injection or external application.

31. (New) The method according to claim 5, wherein an amount of the granule preparation to be administered to a living body is 1 to 10 mg per 1 cm² of a surface area of the living body.

32. (New) The method according to claim 5, further comprising preparing an aqueous suspension preparation for injection by suspending the granule preparation containing freeze-dried fibrin in a liquid excipient before treating, wherein the compounding ratio of the excipient and the granule preparation is 100 to 500 µl of the excipient per 4 mg of the granule.
